<ul style="list-style-type: none">• Collect registration fees from participants and encourage the event• Provide members with appropriate items depending on what they signed up for• Working with different applicants and helping those who seek assistance		

INTERESTS

I enjoy playing basketball, meeting new people, programming and playing video games. I am very interested in programming and pursue a career as a Software Engineer from the University of Waterloo. I want to explore game development, computer security, mobile development and computer graphics.
